# GO GREEN !

As a major global manufacturer of bathing products, we at Jaquar are well aware of our responsibilities. Conservation of precious water as a natural resource has long been the primary goal of our sustainability efforts to help preserve the living planet for our future generations.

Go Green is a philosophy embraced by Jaquar as a tenet of its design and production system to save water.

## Technology that **saves** water

### Flow Restrictors

This is a revolutionary technology that lets your taps and showers save upto 80% of water without compromising on the flow.

Jaquar Flow Restrictors adjust the flow in both low and high pressure conditions and offer the same voluminous flow every time.

Flow Restrictor

Flow rate options available:  
1.4, 2.5, 4.0, 6.0, 8.0, 13 LPM

Flow rate options available:  
6.0, 8.0 & 12 LPM

Flow Restrictor

### Air Showers

Jaquar's Air Showers have a built-in air mixer that mixes air and water in a manner that makes shower drops lighter but voluminous. This revolutionary technology helps Jaquar air showers save up to 30% of water without compromising on the showering experience.

Choose from a wide range of Hand and Overhead Jaquar Air showers with single and multi-flow options.

70% Water + 30% Air  
= 100% Rejuvenation

### Pressmatic Faucets

Taps with technology that allows only a fixed quantity 1.5 ltrs. of water to flow with every press of its knob. This mechanism not only prevents water wastage during each use, but also provides ease of operation.

Jaquar Pressmatic taps are recommended for bathrooms of high traffic locations like restaurants, clubs, hotels, colleges, hospitals, airports etc.

## Sensor Faucets

Faucets with technology that allows water to flow only when you need it and shuts it as soon as you move your hands away, resulting in zero wastage of water. There's no better way to save water than when you don't need it e.g., while washing hands with soap, you can save water when lathering. Use Jaquar Sensor taps in high traffic areas like restaurants, clubs, hotels, colleges, hospitals, airports etc.

## Three stages of washing hands

Pressmatic Faucet	8	Not in use	8	3.01 L	31%

## Dual Flush

Flushes that use more water than needed are the biggest water wastage culprits in every home. Jaquar's dual flushing systems enable you to use either a combination of 3/6 ltrs of water or 2/4 ltrs of water, depending on your water closet. Jaquar's beta valve is designed to save 50-60% of water every day.

## Features

### Advanced Rubit Technology

A feature that keeps showers clean and increases their longevity. Since the spray jets on the showers are made from elastic silicone, they ensure that no limescale deposits stick to the shower face. Even if they do, they can be easily rubbed off by hand or flannel.

### Click Position System

All Jaquar multi-function showers feature the convenient click mechanism. You can feel and hear the click while changing the function of the shower sprays.

### Thermo Insulation

Jaquar's insulated shower systems prevent scalding by not heating up the shower body.

### Jaquar Booster Technology

Jaquar Booster Technology creates the sensation of a full shower regardless of the water pressure.

# Hi-Flow Thermostats

Jaquar's Hi-flow Thermostat is a thermostatic mixer valve that maintains the temperature of the water flowing out of your shower even at low pressure. It reacts and adjusts thereby preventing scalding or freezing by not letting water temperature get too hot or too cold.

## What are the Benefits:

- Jaquar's is the first thermostat that works even at low water pressure, making it suitable for Indian conditions
- Temperature remains constant for the complete duration of your shower
- No temperature variation, even if there is a sudden drop in pressure (if someone uses hot water in the kitchen or if someone flushes a toilet)
- In case of a failure of cold water supply, the Thermostat will completely shut off the hot water, preventing scalding from hot water
- Provision of re-starting the shower - no need to adjust the temperature time and again

## Features

- Cartridges made of high performance thermostatic polymer materials that meet the global standards for high and low pressure
- Option of pre-setting the cartridge at a specific temperature (as desired)
- High technology thermoplastic polymer minimises lime-scale build up
- One of the best in terms of temperature regulation and safety in accordance with various standards : NF EN 1111 (marquee NF077), ASSE1016 & NHSD08
- Standard temperature range: 15° C to 60° C (59 – 104 degree F)

## Technologies that save energy and money

To let you enjoy using them without worrying about the power bill, Jaquar Spas come with a whole range of energy efficient technologies.

### Cabinet Insulation

Jaquar Spas have insulation in the perimeter of their cabinets to maintain the warmth of the water, and the spa's plumbing and equipment, further reducing your energy costs. The insulation system has two features that make it superior to the traditional 'foam on shell' spa insulation system. By insulating the cabinet instead of the shell, Jaquar

Spas not only retain heat from the pumps and equipment, but also insulate the plumbing that otherwise would lose heat to the environment. This results in less overall heat loss and lower running costs. What's more, the insulation reduces the noise of the spa pumps so you will also enjoy a quieter, more tranquil spa experience.

### Intelligent Thermal Regulation

Allows the spa to tune itself to its environment, day-to-day and season-to-season, thus reducing your heating costs by up to 20%. Thermal performance and heat retention is what distinguishes one spa from another. Jaquar's control system adapts and tunes itself to the thermal properties of your spa pool, in its

environment, day to day and season to season, to reduce 'on demand' heating. The control system of a Jaquar Spa actually 'learns' how your spa is used. By reducing the temperature drop required before the heater switches on, it provides more consistent spa water temperatures and lowers daily operating costs.

### Smart meter ready

Even if your electricity provider does not currently offer smart meters, they soon will. A smart meter allows your electricity supplier to charge higher prices in periods of high demand, but rewards consumers who shift their consumption to low demand periods such as overnight. Using Power

Save software, Jaquar Spas can be designed to do the filtering and heating when power costs are at their lowest. Best of all, the control is in your hands. You can tailor the operation of your Jaquar Spa to take advantage of smart meter technology and reduce your running costs.

### Purezone Micro Filtration

The top priority of an effective water treatment system is to remove waterborne contaminants. Conventional filters only trap particles up to 50 microns in size.

### A luxurious spa experience

Jaquar Spas have superior hydrotherapy performance and features that are seen in the world's most expensive spas.

### Hydroflow jets

A Jaquar Spa's hydroflow jets are designed to maximise jet pressure and provide a world-class hydrotherapy experience. We choose from a multitude of directional, spinning and fixed jets to

create a different massage action in each seat. Some seats give a broad massage using wide sweep rotational jets, whilst others provide a pinpoint, Shiatsu-style massage.

# Features

## **Ergonomic design**

Jaquar Spas are designed to maximise your comfort. Jets are positioned to massage tired muscles. The controls are within easy reach. And relaxation comes automatically.

## **Easy to operate**

Jaquar Spa control systems are intuitive and easy to operate and offer maximum flexibility and control. The top side panel controls most functions with one touch of a button. More advanced controls can be accessed through the simple English menu functions.

## **Two lounge seats**

To avoid arguments over who gets the spa's lounge (usually the most comfortable and most coveted seat in the spa), most Jaquar Spas have two luxurious hydrotherapy loungers.

## **Individual pressure control**

To ensure complete satisfaction for all, each seat in your Jaquar Spa can be controlled with the seat's pressure control dial. In addition, most jets can be individually controlled, directing pressure to where you need it most.

## **Dynamic lighting options**

Flood lighting, jet lights, backlit drink holders and water features, waterline illumination and access lighting can all be added to your Jaquar Spa to enhance your experience. Lighting programs can be controlled using the spa's topside controller.

## **Neck therapy collar**

Optional on most Jaquar models, the neck therapy collar incorporates jets specially designed to eliminate stress and tension carried in the neck and shoulder area. Opt for the neck therapy collar to soothe away the stresses of your day.

# Saunas

# Saunas

A Sauna is a bathhouse or room, usually made of wood, which uses dry heat to induce perspiration, with steam being produced by pouring water on heated stones. Perspiration or sweating is one of the main ways our bodies get rid of the traces of hundreds of toxins that accumulate inside us from pesticides, drugs and manmade chemicals. 15 minutes in a Jaquar sauna can help us sweat as much as we might otherwise do

## Advantages:

### **Detoxification**

Saunas stimulate the body to release fat-soluble toxins, heavy metals, and other toxic chemicals in sweat via pores more effectively than any other form of heat therapy or exercise. Reports have been made that it can relieve the symptoms of drug-induced lupus. The list of chemicals claimed to be removed from the body includes: mercury, lead, copper, cadmium, manganese, sodium, chloride, arsenic, nickel, benzenes, street drugs, prescription drugs, anaesthetics, cholesterol, urea, nicotine, sulfuric acid.

### **Immune System Enhancement**

A typical sauna session will cause a brief 1 to 3 degree F increase in body temperature. Fever is the body's defence against bacteria, microbes and consequent infection. The production of white blood cells by the bone marrow and killer T cells by the thymus results in boosting immunity, overall.

### **Stress**

Continuous strain on the autonomic nervous system leads to a high level of stress, one of the elusive causes of many chronic diseases.

### **Weight Control**

A 15 minute sauna session is as effective for weight loss as rowing or jogging for 30 minutes. The improved blood flow to organs and endocrine glands speeds up their metabolic process, increasing caloric burn. Because fat becomes water soluble at 110 degrees F, subcutaneous fat can be released along with the sweat and toxins.

over an entire day or more. And the benefits of this are many – ranging from relieving common cold symptoms to aiding in medical conditions like chronic fatigue, rheumatoid arthritis, musculoskeletal pain, and even cardiovascular and skin conditions. Sauna sessions can also improve performance in endurance sport and help recuperation after childbirth.

### **Cardiovascular Conditioning**

The human body will naturally try and cool itself as temperature increases. It does this by diverting blood from the internal organs to the extremities and skin by vasodilation. This increases heart rate, cardiac output and metabolic rate.

### **Cellulite**

Cellulite is a gel-like substance made up of fat, water and wastes, which are trapped in pockets below the skin. Profuse sweating is purported to clear this form of unwanted debris. A Sauna is effective in cellulite removal when used in conjunction within a program that includes diet and massage.

### **Pain Relief and Control**

Saunas help to eliminate or reduce the pain of arthritis, muscle spasms, shoulder pain, neck and back pain, sprains of any area, and reduce scar tissue and adhesions. Will rapidly increase the healing process in any non-acute injury.

### **Skin Cleaning and Rejuvenation**

Saunas open clogged pores allowing for removal of dirt, oil, and makeup. In addition, there are improvements in skin problems such as acne, rashes, burns, eczema and psoriasis. Scars, even keloids, may be gradually softened.

# Steam Solutions

# Steam Solutions

For those seeking wellness in the comfort of their homes, a Jaquar Steam Cabin is a great way to enjoy the benefits of humidifying water vapour from a high-quality steam generator.

## Advantages:

- **Clearer skin:** Steam showers have the ability to unclog pores and remove deeply trapped congestion from under the surface of the skin
- **Infection treatment:** A major benefit of regular steam showers is relief from respiratory infections
- **Increased circulation:** Steam showers are an excellent way to naturally boost circulation throughout the body. Increased circulation brings more oxygen to cells and decreases the risk of hypertension, hardened arteries and muscle function
- **Stress relief:** One of the most powerful benefits of steam showers is their ability to reduce both physical and mental stress
- **Metabolism and weight loss:** Hot steam increases blood flow by stimulating the lymphatic system which, in turn, helps to speed up the metabolism

## Features

### Absolute Quality of Materials

Jaquar Hydromassage showers are made of co-extruded acrylic, which does not discolour and has a long life. This hygienic material, together with the smooth surfaces and tempered glass shower enclosures, makes cleaning an easy part of the product experience.

### Stability and Mechanical Resistance

Jaquar shower boxes are characterised by stability and solidity thanks to the zinc-plated steel frame that ensures maximum rigidity of all the components. Stability and mechanical resistance are also the attributes of the shower tray reinforcement.

### Easy Installation

The installation of the shower boxes is as easy as it can be: the metal frame carries the elements and is simply put together.

### Safety

The range of hydromassage showers meets all the relevant safety standards which are currently in effect. Extra safety that goes beyond

any norms is part of the product values that any demanding customer can expect from a leading product. For example, the shower tray surface is ribbed, providing for an excellent anti-slip feature. The steam generator will turn itself off automatically after the preset timeout, avoiding wasting energy and the risk of overdoing a steam bath.

### Digital Control

It allows you to manage all manual control functions including sequential back rain jets, back jets, waterfall cervical massage, duration of vertical hydromassage, steam bath function, light, radio and white LED lighting

### Control Units

All the hydromassage shower functions can be simply adjusted through easy-to-use control units.

### Manual Control

It allows you to manage showerhead and vertical jets as well as activate the steam-bath function.
